

RAMAGYA SCHOOL, NOIDA

VII/SCIENCE/2017-18 OLYMPIAD PRACTICE WORKSHEET

- 1) Chalk consists of
 - a) calcium
 - b) carbon dioxide
 - c) oxygen
 - d) all of them
- 2) Elements residing in same group share same
 - a) physical properties
 - b) chemical properties
 - c) both a and b
 - d) special properties
- 3) Carbon, hydrogen and oxygen combines together to make
 - a) sugar
 - b) polythene
 - c) chalk
 - d) common salt
- 4) A pure substance which consists of two or more elements which have been combined chemically is called
 - a) element
 - b) compound
 - c) mixture
 - d) solute
- 5) First person who arranged elements in form of periodic table was:
 - a) Lewis
 - b) Mendeleev
 - c) Thomas
 - d) Darwin
- 6) Elements which are named after scientists are
 - a) Curium
 - b) Einsteinium
 - c) Both a and b
 - d) Aurum
- 7) Cu is symbol of element
 - a) Copper
 - b) Cobalt
 - c) Both a and b
 - d) Curium
- 8) Sand is made up of
 - a) silicon
 - b) oxygen
 - c) both a and b
 - d) glass
- 9) All elements possesses different
 - a) physical properties
 - b) chemical properties
 - c) both a and b
 - d) special properties
