**Directions ( Que no 14 to 16)Read the passage and answer the questions that follow.**

The greatest threat of life on Earth today comes from global warming. This is caused due to multiple factors including human activity. It happens when green house gases( carbon-di-oxide, water vapour, nitrous oxide , methane) trap heat and light from the Sun in the earth's atmosphere which increases the overall temperature on earth. This impacts people, animal, and plants. Many who can not take the change , die. Global warming is affecting many parts of the world, particularly sea coast. People living on islands and in coastal areas are therefore at risk as the polar ice caps and sea level rise.

14. "Many cannot take the change. " here change refers to the changes in

- A. Life style
- B. Food habits
- C. Temperature
- D. Health issues

15. According to the passage select the statement that is false.
